Details

A PAIR of Linux servers (CentOS Linux by default) with the at least 200GB of Storage available in a DRBD/OCFS Clustered Filesystem, with your preference of Apache/Nginx, PHP/Perl and MariaDB Galera MySQL Cluster or other Open-Source software installed and configured based on your requirements and dependencies (eg: MySqlAdmin is installed).

At least 4 x CPUs and 4GB of fast RAM and RAID10 Disk arrays are provisioned initially for each of the 2 x VPS for your Linux Cluster, with more resources available as required or if high loads are expected.

eg: Use our ["Extra 1GB RAM for your VPS"](#) product to get an additional 1GB of RAM **on each of** your Clustered Linux Servers.

Each VPS is provisioned on physical separate VPS Hosting Platforms for further redundancy.

You have full access to the Linux OS and to all available system functions and commands.

Though this is not a "managed" VPS product, Network Presence SysAdmins are available for 1 hour / month of phone, Skype or IM contact and on-server systems administration work.

Easily upgraded, migrated or cloned to high specification VPS Plans as req'd.

You have 24x7 Ticketed and 8am to 8pm Live SysAdmin Support included.

Please [contact us](#) with any queries you may have on this Appliance VPS.
